

GP20

125kHz RFID RO reader

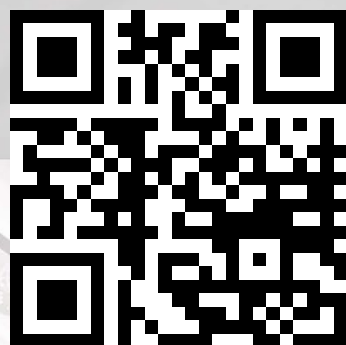

DESCRIPTION

The GP8, GP20 and GP30 proximity readers are small readers. They operate with voltages from 5 to 12.5 VDC and provide a good reading range already at 5V, which allows them to be used in many applications.

A unit can be configured in different ways with the most common interface types such as Wiegand, Magstripe, Clock/Data and RS232. This allows upgrades in existing installations.

SPECIFICATIONS

- Low cost
- Good reading distance – up to 30 cm
- Programmable interface
- Small profile
- Weatherproof
- Dimensions: 78 x 43 x 15 mm
